From the President's Desk

As we continue to navigate the disruptions and challenges caused by the COVID-19 pandemic, I'd like to take a moment to express my gratitude for how our community has been responding, and to reflect on what guides our decision-making during this challenging time.

I truly appreciate the hard work and ingenuity shown by our faculty and staff in recent times. They have worked tirelessly to develop and implement ways to support our students and help sustain their academic progress.

I'd also like to thank our students for being flexible and patient under such stressful circumstances.

With the pursuant goal of excellence in academic deliverance, patient treatment and community service our students and faculty have earned laurels nationally and internationally. I commend all for their hard work and endeavour.

I acknowledge the hard work put in by all faculty for the publication of this Annual Report of the year 2020 - 21 of Saraswati Dental College, Lucknow.

Best Wishes.

Saraswati Medical & Dental College Society

Saraswati Medical & Dental College Society was created to support and complement healthcare needs in the country. This charitable society visualized the twin objectives of providing quality professional education and healthcare services through its constituent institutions. In order to accomplish challenges of 21st century, the Society identified key pillars to support its endeavors. These pillars comprising of sincerity, honesty, integrity, academic excellence through global outlook, leadership, and participative engagement of academia-community-industry have collectively contributed towards establishing the Saraswati Group of Colleges in general and Saraswati Dental College in particular as a unique institution for higher dental education and social healthcare outreach.

Saraswati Dental College

Saraswati Dental College (SDC) established in 1998 at Lucknow, Uttar Pradesh is a dream project of Lt. Col. Dr. T.S. Mathur (Ret.). During his long and illustrious career with the Dental Corps of Indian Army, he became aware about the huge unmet demand of dental healthcare services in the country and a deficit of competent dental professionals to meet the challenge. With this vision, SDC was established and has since developed into a centre of professional excellence in the field of dental education, healthcare and research. The institute aims to become a global brand to generate competent dental professionals and provide a non-discriminatory campus environment that encourages intellectual curiosity, pursuit of new knowledge, academic freedom and professional integrity.

The institute is affiliated to Dr. Ram Manohar Lohia Avadh University, Faizabad, Uttar Pradesh for award of BDS and MDS degrees in the subjects of Conservative Dentistry & Endodontics, Oral & Maxillofacial Surgery, Oral Medicine & Radiology, Oral Pathology & Microbiology, Orthodontics & Dentofacial Orthopedics, Pediatric & Preventive Dentistry, Periodontology, and Prosthodontics and Crown & Bridge. These courses are recognized by the Dental Council of India.

SDC has been assessed by 'S.G. Certifications' and is certified for meeting the requirements of ISO 9001:2008 Quality Management System in Dental Medical Education and Patient Care. The institute has also been awarded the 'Best Private Dental College in North India' for Education Excellence by the Brands Academy in 2012, 2013 and 2014. The College has been ranked First among 'Private Dental Colleges in North India', 5th among 'Private Dental Colleges in India' and 12th among 'Top 15 Dental Colleges in India' as per the survey by Outlook Magazine in 2011 and 2012. The institute has also been given 'Five Star Status' amongst India's top Private Dental Colleges by 'The Pioneer', New Delhi on 06 June 2014.

The Institute has been recognized as Scientific & Industrial Research Organization (SIRO) by the Department of Scientific & Industrial Research (DSIR), Ministry of Science & Technology, Govt. of India. Another landmark achievement of the institute is the approval of the Institutional Animal Ethics Committee (IAEC) by the **Committee for the Purpose of Control and Supervision of Experiments on Animals (CPCSEA)**, Animal Welfare Division, Ministry of

Environment & Forests, Govt. of India, for procuring and conducting research using laboratory animals.

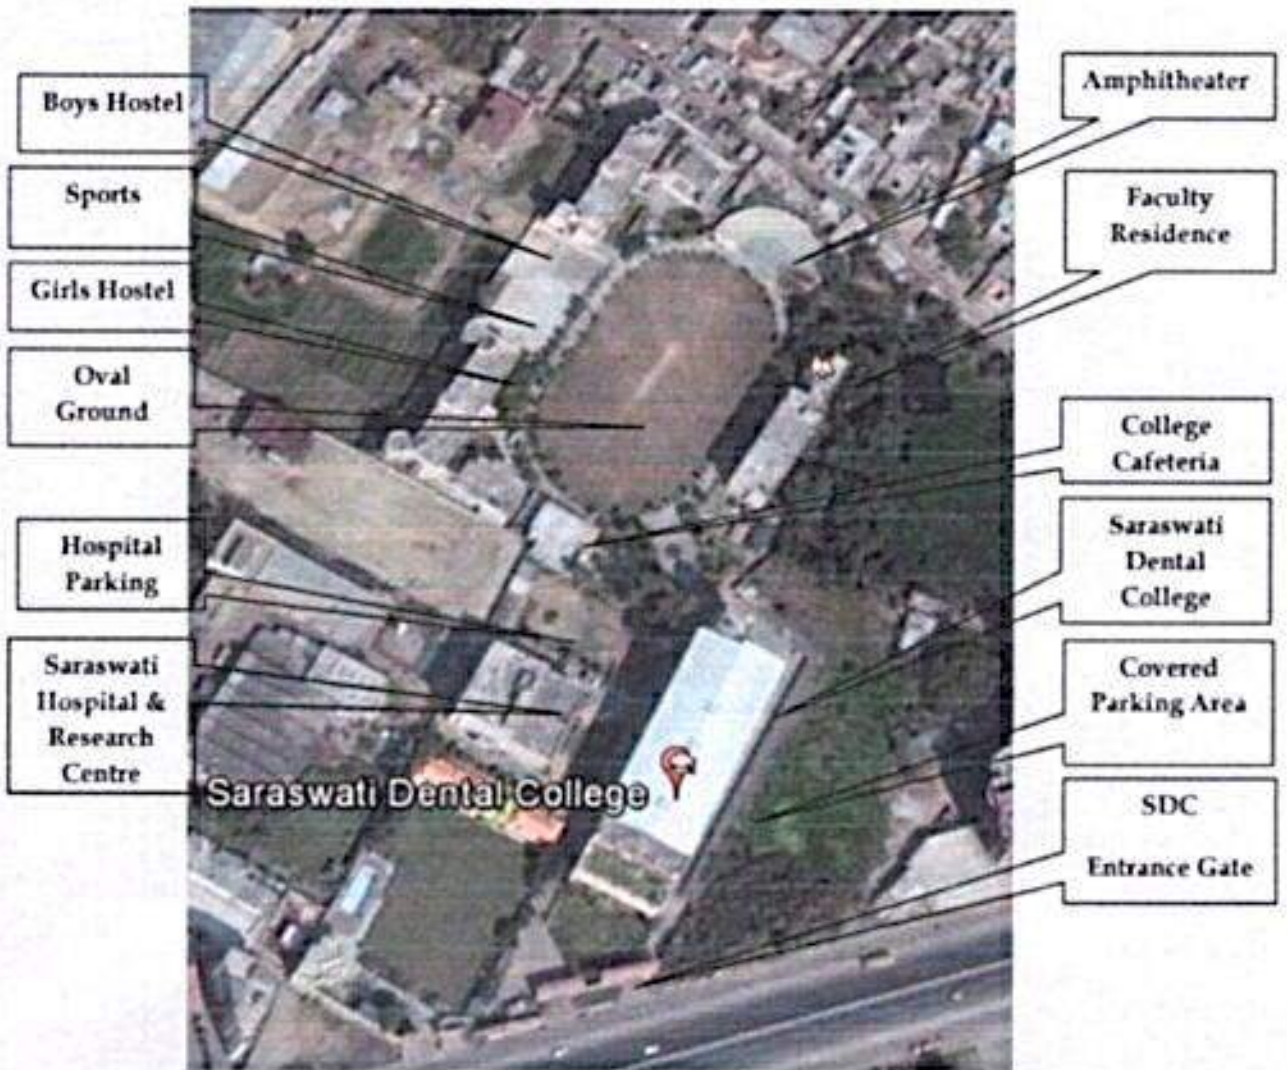

Several collaborative research projects have been completed and are undergoing with various organizations of national repute like Indian Institute of Technology (IIT), Kanpur, **Indian Institute of Toxicology Research (IITR, previously IIRC)**, Lucknow, **Central Drug Research Institute (CDRI)**, Lucknow etc.

Some of the significant Memoranda of Understanding (MoUs) signed by the institute are with the University of Tennessee, USA, University of Pennsylvania, USA, University of Sanford, USA and Integral University, Lucknow, India for mutual collaboration in teaching and research.

PRINCIPAL'S REPORT

It's a feeling of immense pride to present the Annual Report of Saraswati Dental College and Hospital for the year 2020-21. Our most cherished motto is to empower our students through education and this institution is a prime centre of knowledge enhancement and career development. I foresee a better future of our institution and with the cooperation of the faculty members along with our students to attain a great new height.

"Technology won't replace teachers but teachers who use technology will probably replace teachers who do not."

With the advent of the coronavirus pandemic, came the containment measures of self isolation, social distancing and self quarantine, which resulted in a major interruption in the academic year of students, implying a big gap in their learning mode. The timely steps taken ensured the learning to be continued to go on even at homes with the help of technological alternatives including networking channels such as the computer, smartphones, Zoom app etc

Corona hazard made measures to conduct Examination through online mode. Systematic way of exams scheduled gained attention, support and appreciation from parents and well wishers. Two modes of examination pattern namely Google form mode and pen paper mode were followed and carried out under the guidance of the teachers in their respective online classrooms. Mark sheets generated and progress reports were maintained by every subject teachers.

Let me conclude my words with heartfelt gratitude to all our stakeholders for their whole hearted support for bringing up the very best out of us to illuminate each moment of our academic traverse.

I congratulate all the contributors and the editorial board for bringing out this edition. I extend my wishes to all the heads of the department, most energetic faculty and extremely talented students for scaling bigger success and achieving newer heights in the coming years.

Thank you

The Charter

The Department of Conservative Dentistry deals with the diagnosis, treatment and prognosis of defects of teeth that do not require full coverage restorations for correction which results in the restoration of proper tooth form, function and esthetics while maintaining the physiologic integrity of the teeth in harmonious relationship with the adjacent hard and soft tissues. The scope and the arena of this Department include the treatment provided by fillings in the form of, Silver Amalgam, Composite, Glass Ionomer Cement and Direct Filling Gold. The teeth which cannot be restored by conventional means are restored by putting metallic inlay, onlay, crowns which will be metal ceramic or all ceramic. The management of teeth which are infected is undertaken by providing state of art Root Canal Treatment and, if need be, then surgical intervention is done. By far, the endeavor is to conserve all teeth including, if possible, the so called wisdom teeth, giving them not only functional support but providing esthetically pleasing and effective smile line. For this, veneering, bleaching and all ceramic work is also undertaken.

The Department is equipped with advanced dental chairs, dental equipments, microscope, intra-oral radiographic machines including radiovisiography with digital printer and sophisticated methods for sterilization of instruments so as to render quality care and well being of the patients. The Department offers three year post-graduate programme in addition to under-graduate teaching as per DCI norms and endeavors to provide adequate knowledge, necessary skills and reasonable attitude for carrying out activities appropriate for dental practice. The students are exposed to a wide range of dental problems to get extensive clinical experience.

The faculty members are assigned the responsibility to guide final year students with their quota assigned by the DCI, periodically assess the students theoretically and clinically, keep record of the follow-up and research projects undergoing in the department, guide the interns

to fulfill quota assigned by the DCI, conduct seminars and supervise project work of the Interns.

Research thrust areas

- Antimicrobial efficacy of various dentin bonding agents.
- Effect of time and ultrasonic activation on carbonated water on smear layer removal using scanning electron microscopy.
- Sealing ability of conventional sealers with bio-root, RCS and gutta flow.
- Push out bond strength of glass fiber post luted with different luting cements
- Accuracy of two apex locator using K-File, NiTi Hand File and Custom made wire.
- Different irrigating solutions on micro hardness on root canal study
- Evaluation of post obturation pain in single visit endodontic treatment after premedication
- Comparative evaluation of efficacy of EDTA, carbonated water and chloroquick in smear later removal
- Comparative Evaluation of shear bond strength between alkasite restorative material and resin based composite
- Comparison of platelet rich fibrin and mineralized freeze dried bone allograft to radiographically evaluate healing post endodontic surgery
- Antimicrobial efficacy of herbal extracts against *Enterococcus faecalis*-*candida albicans* compared to Chlorhexidine-sodium hypochlorite
- Comparative evaluation of sealing ability of three coronal orifice barriers.

Ongoing research projects

A. Faculty

B. Dissertation of M.D.S. students

A. Ongoing

- **Dr. Shatakshi Rastogi**

Comparative evaluation of herbal extracts; Articum lappa and Horsegram with 2% chlorhexidine as an antimicrobial endodontic irrigant against *Enterococcus faecalis* - An in-vitro study.

Supervisor: Dr. Kapil Loomba

Co-supervisor: Dr. Raju Chauhan

- **Dr. Soni Pandey**

Comparative evaluation of Antimicrobial efficiency of different intracanal medicament against *Enterococcus faecalis*-An in-vitro study.

Supervisor: Dr. Raju Chauhan

Co-supervisor: Dr. Gaurav Jain

- **Dr. Srinjal**

Comparative evaluation of sealing ability and antimicrobial efficacy of three bioceramic based retrograde filling materials used with and without silver nano particles-An in-vitro study.

Supervisor: Dr. Raju Chauhan

Co-supervisor: Dr. Ajay Paliwal & Dr. Nitin Jhunjhunwala.

- **Dr. Supurna**

Effect of different in office bleaching gels on color, roughness and enamel micro hardness - An in-vitro study.

Supervisor: Dr. Ajay Paliwal

Co-supervisor: Dr. Kapil Loomba

- **Dr. Anupama**

Comparative evaluation of removal of root canal smear layer using different root canal irrigants -An in-vitro study.

Supervisor: Dr. Gaurav Jain

Co-supervisor: Dr. Kapil Loomba.

B. Dissertation Submitted

- **Dr. Prabhu Varsha**

Comparative evaluation of change in Microhardness and surface roughness of aesthetic restorative materials after exposure to different commonly consumed beverages - An in-vitro study.

Supervisor: Dr. Raju Chauhan

Co-Supervisors: Dr. Gaurav Jain

- **Dr. Nikita Sharma**

A comparative evaluation of microhardness and smear layer removal efficacy from root dentin by different irrigant solutions - An invitro study

Supervisor: Dr. Raju Chauhan

Co-Supervisors: Dr. Gaurav Jain

- **Dr. Srinkhala**

Comparative evaluation of influence of anti oxidant irrigants on the push out bond strength of dual cure adhesive resin cement on root dentin: An in vitro study.

Supervisor: Dr. Praveen

Samant Co-Supervisors: Dr.

Kapil Loomba

- **Dr. Sonali Jain**

Comparative evaluation of shear bond strength of composite resin after removal of eugenol based sealer from coronal portion of tooth using conventional method and various agents: An in- vitro study.

Supervisor: Dr. Gaurav Jain

Co-Supervisors: Dr. Ajay Paliwal

- **Dr. Priyansha Singh**

A comparative evaluation of antimicrobial efficacy of different herbal extracts and 2% chlorhexidine gluconate as irrigant against E. Faecalis - An In vitro study.

Supervisor: Dr Praveen Singh Samant

Co- Supervisor: Dr. Ajay Paliwal

• **Dr. Bikram Brahmachary**

A comparative evolution of penetration depth of various endodontic irrigants into radicular dentinal tubules using two agitation device- an in-vitro study.

Supervisor- Dr. Ajay Paliwal

Co-Supervisor: Dr. Nitin Jhunjhunwala

• **Dr. Varnika Yadav**

A comparative evaluation of dentinal tubular penetration depth of different root canal sealers using different sealer placement techniques- An in vitro study

Supervisor: Dr. Praveen Singh Samant

Co-Supervisor- Dr Ayush Singh Razdan

B. M.D.S. Degree awarded

• **Dr. Shreya Singh**

A comparative evaluation of shear bond strength composite restorative material after using different types of mouth rinses- an in vitro study.

• **Dr. Karishma Anna Barrow**

Comparative evaluation of apical microleakage and antimicrobial efficacy of different root canal sealers used with or without silvernanoparticles and MI varnish- an in vitro study.

• **Dr. Varnika Yadav**

A comparative evaluation of dentinal tubular penetration depth of different root canal sealers using different root canal sealers using different sealer placement techniques – an in vitro study

• **Dr. Vandita**

A relative assessment of the internal adaptation of lining materials to dentin – an in vitro scanning electron microscope study.

• **Dr. Ritwik Shyamal**

A comparative evaluation of coronal sealing ability of zinc oxide eugenol and three different bioceramic root canal sealers – an in vitro study.

• **Dr. Shreya**

Evaluation of amount of apical debris extrusion using different motions of endodontic files during root canal instrumentation- an in vitro study.

The Charter

The Department deals with the academic and clinical activities related to Oral and Maxillofacial Surgery in addition to research work. The academic activities involve teaching programme for undergraduate third and final year and postgraduate students. At the postgraduate level the Department is involved in imparting comprehensive knowledge of the speciality subject i.e., Oral Surgery and Craniomaxillofacial surgery, in addition awareness on basic subjects like anatomy, embryology, biochemistry, physiology, pathology, pharmacology, general surgery and general medicine etc.

At clinical level, Department is equipped with latest state of art equipment. The faculty in the Department is well trained and experienced to perform major and minor maxillofacial surgical procedures. Faculty routinely performs minor oral surgical procedures which include simple extractions, surgical extractions, apicectomies, dental implant insertion and sinus lift procedures, cyst enucleations, incision and drainage, biopsies and neurectomies etc. Major maxillofacial surgical procedures which are routinely performed are for management of conditions like polytrauma, temporomandibular joint diseases, cleft lip and palate cryosurgical treatment of soft tissue lesions orthognathic surgeries, facial esthetic procedures head & neck oncosurgeries, resection and reconstruction procedures etc. The Department is looking forward to incorporate laser and operating light mounted CCTV cameras in the Department armamentarium.

The Department also trains undergraduate students clinically to perform minor surgical procedures and postgraduate students to perform minor surgeries and assist and perform major maxillofacial surgical procedures.

Research thrust areas

- Pre-cancerous lesions and conditions
- Tissue engineering/ regeneration
- Integrated approach towards rehabilitation
- Integration with AYUSH
- Facial Rejuvenation

The Charter

The Department of Oral Medicine & Radiology deals with the health and diseases of the oral and para-oral structures. This is the Department where the patient is first received and elaborate general and medical history of the patient is taken followed by thorough examination and investigations for disease diagnosis.

The selection of the faculty is done on the basis of merit of academic achievements and experience to train the students. The department has UG and PG Section with a separate Radiology Section and Seminar Hall with well-equipped latest teaching facilities, which facilitates basic and advanced training research activities in the field of Oral Medicine and allied sciences.

The Department has a rich collection of teaching materials in the form of books, journals, library dissertation, dissertations, and seminars in CDs and print form. The valuable collection of special cases and radiographs adds to the knowledge of students and to the existing number of patients reporting to OPD. Internet facility can be availed in the department by PGs and staff. The PGs are trained in not only in the Dental College but also in the Medical Hospital for the allied medical subjects and are even posted in Cancer Institute for diagnostic and therapeutic radiology.

Along with above mentioned measures, the department also conducts regular departmental meetings for regular monitoring of the curriculum, and discussions, tests and exams for students to evaluate their performance. On the basis of the above, slow learners are identified and remedial classes are arranged for them. The staff and students participate regularly with all enthusiasm in CDEs and conferences at International, National, State and local level and are involved in various research projects. Indeed, the department is highly proud of its vibrant achievements (curricular/extracurricular, International, National,

State and local publications and presentations). The support and dedicated work of support staff further fosters the smooth functioning of the Department.

Research thrust areas

- Potentially malignant and Malignant Oral Disorders
- Tobacco cessation and its control
- Forensic Odontology
- Innovative techniques in Oral & Maxillofacial Radiology

The Charter

The Department of Oral Pathology & Microbiology performs two basic functions in addition to research activities for betterment of mankind. First and foremost is the teaching of undergraduate and postgraduate students. At undergraduate level, the department takes care of teaching of Dental Anatomy and Oral Histology during the first year and Oral Pathology, Microbiology and Forensic Odontology during the second and third year. In case of postgraduate students, the aim is to make them rich with complete knowledge of General and Oral Microbiology, Oral Pathology and Embryology of the head and neck so as to mould them into a good teacher and an efficient Oral Pathologist. The second major function of the department is to provide efficient and conclusive histopathological and cytopathological services to the patients.

The research works undertaken in the department primarily relate to early diagnosis and understanding of oral conditions prevalent in India, so as to facilitate better management of the oral diseases.

The Department continuously strives to improve and upgrade the level of undergraduate and graduate teaching, upgrade infrastructure facilities, establish full fledged immunohistochemistry and immunofluorescence laboratory so as to emerge as a nodal center for advanced diagnosis and research in the area of oral pathology and especially in the area of oral cancer.

Research thrust areas

- Potentially malignant oral lesions
- Oral cancer
- HIV
- Forensic Odontology
- Diabetes mellitus
- Tobacco related disorders

The Charter

The Department of Orthodontics & Dentofacial Orthopedics deals with the interception and management of all dental and facial growth-related disorders including malocclusion. The department is well equipped with advanced dental chairs, sophisticated equipment's and advanced methods for sterilization so as to render quality care and well-being of the patients.

The Department offers three-year post-graduate program in addition to undergraduate teaching as per DCI norms. We endeavor to provide adequate knowledge, necessary skills and reasonable attitude for carrying out all activities appropriate to specialized practice of orthodontics and dentofacial orthopedics by the specialists and related general dental practice by the undergraduates involving prevention, diagnosis and management of malocclusion. The students are exposed to patients with wide range of malocclusions and oro-facial growth problems and thus get extensive clinical experience in their diagnosis and management.

We provide basic and advanced training in the management of malocclusion with all types of removable and fixed appliances. A special emphasis is laid on Angle philosophy and Tweed appliance leading to the recent techniques of various SWA systems. We also provide advanced training of cases requiring growth modification with various techniques including surgical and cleft orthodontics.

Research thrust areas

- Lasers
- Ultrasound
- Transcutaneous Electric Nerve Stimulation
- Plasma Rich Proteins
- Finite element analysis
- Digital and advanced diagnostic techniques

The Charter

Pedodontics is an age-defined specialty that provides primary and comprehensive, preventive and therapeutic oral health care for infants and children through adolescence including those with special health care needs.

Department of Pedodontics & Preventive Dentistry offer graduate (Bachelor of Dental Surgery) and post-graduate program (Master of Dental Surgery) and are affiliated to Dr Ram Manohar Lohia Awadh University. The course is approved and accredited by Dental Council of India.

The goals of the branch of Pedodontics deal with the identification and differentiation of normal and abnormal somatic dentofacial and psychological growth and development, understand child behavior and anxiety, and communicate with and manage child showing apprehension and moderately disruptive behavior using behavioral and pharmaco-therapeutic techniques. We develop an accurate database from information received from the child and the parent, formulate and accurate diagnosis, plan appropriate therapy for common oral health problems in children, and provide treatment for mental, physical and emotionally handicapped children including medically compromised patients. We recognize and manage medical emergencies commonly encountered in children and adolescence undergoing treatment and make appropriate referrals.

Faculty of the Department is committed towards an excellence in teaching schedules. Students are assessed from time to time by internal assessment examinations, case discussions, demonstrations, group discussions, viva-voce, seminars and journal completion. Through excellence in teaching and training with a focus on patient-centered compassionate oral health care, we ensure our graduating dentists gain the necessary knowledge and skills to serve their community.

The vision of the Department of Pedodontics & Preventive Dentistry is to be a recognized leader in providing excellent oral health care for infants, children and adolescent including those with special needs. Continuously enriching the knowledge and professional skills by participating in workshops, CDEs, conferences and other academic activities. Being actively involved in research by focusing on thrust areas and performing community dental services especially for the underprivileged sections of society.

Research thrust areas

- Caries Epidemiology
- Dental Fluorosis
- Cariology
- Preventive Dentistry
- Dental Materials
- Revascularization of pulp

The Charter

Periodontology is the science dealing with the health and diseases of the investing and supporting structures of the teeth and oral mucous membranes. The Department of Periodontology deals with the motivation, education and providing all kinds of nonsurgical and surgical treatment pertaining to patients with oral and periodontal diseases. Department provides quality education to third and fourth year BDS students. This helps them to understand etiopathogenesis, diagnosis and management of common periodontal diseases. With the annual intake of two postgraduate students, the department provides basic and advanced education that helps in developing theoretical and practical knowledge and skill in the area of periodontology and oral implantology.

The Charter

The Department of Prosthodontics and Crown & Bridge has successfully diversified the teaching and training curriculum at the post-graduate level by adding components of maxillofacial prosthetics, Cleft Lip and Palate Prosthetics, Sleep Apnea Prosthetics and Geriatric Oral Health. The Department is the first in the country to successfully operate a Craniofacial and Sleep Apnea Prosthetic unit and a Geriatric Oral Health Unit with the support of other centers of health care and medical education since 2017. The treatment rendered is free to the patients and has improved the standard of treatment options available to such patients. The Department has devised a strategized protocol for complete denture service, which is unique.

Diversified Curriculum

Craniofacial and Sleep Apnea Prosthetic Unit

Craniofacial and sleep apnea prosthetic unit, inaugurated in January 2012, has continued to provide patient care services at Lucknow Cancer Institute, Sushrut Institute of Plastic Surgery and Department of Pulmonary Medicine, KGMU.

Geriatric Oral Health Unit

The Geriatric Oral Health Unit intends to cater to the specific oral health needs of the old and the infirm. Aging brings with it a derangement in physical and mental state and consequent dependence for activities of daily living. Psychosocial issue such as physical and financial insecurity, fear of ostracism and abandonment and depression are common afflictions of the geriatric population. This leads to self apathy and neglect and personal hygiene. The alarming revelation about the relationship of poor oral hygiene and predilection to cardiac and respiratory disease has necessitated a concerted effort at maintenance of oral health and the hygiene of all types of oral prosthesis. Further in caregiver institutions, the nursing staff is often negligent to the protocols of assistance in oral health care. Hence training module for them also needs to be evolved.

Research thrust areas

- Dental sleep medicine
- Maxillofacial prosthetics
- Bone biology
- Dental Materials
- Prosthodontic care for geriatric patient

Ongoing research projects during the year

Faculty

- Biomarkers for diagnosis of obstructive sleep apnea
- Molecular mechanisms of osseointegration
- Mechanisms of bonding of ceramic to non-precious and semiprecious alloy.
- Identification of barriers to seeking treatment in Prosthodontics.

The Charter

The Department of Public Health Dentistry is dedicated to meet the health needs of the community through available knowledge and resources. The services provided by the department cover full range of preventive, curative and rehabilitative services for the rural population with no cost what-so-ever to the people through:

- Satellite Centers, which are dental clinics
- Regular dental health care programs/camps
- School dental checkup programs
- Awareness programs using charts, personal interviews and models to provide comprehensive oral health care

The department has an airconditioned MOBILE DENTAL VAN equipped with a dental chair with all attachments required for functioning, a basin, a wooden almirah for keeping instruments and materials, public address system, generator and a compressor to make all specialty services available to the rural population at their doorstep.

Camps organized

Community outreach of faculty and students of the Department of Public Health Dentistry is facilitated through scheduled visits to various nearby villages, schools, colleges and other institutions for providing services like oral health awareness, diagnostic and treatment camps. Emphasis is also laid to make the masses aware of various communicable and non-communicable diseases and methods of preventing them. The institute has a dedicated "Mobile Dental Van" for this purpose. This sensitizes the students and faculty towards the dental/medical

healthcare needs of the society and gives them the opportunity to effectively interact with patients of diverse social backgrounds. During this year a total of 82 camps were organized where patients were examined as detailed below:

S.no.	Date	Place of camp	Type of camp	Total number of patients diagnosed
1.	19-12-2020	Village Sarthara	Educational	26
2.	28-1-2021	Village Dhawa	Educational	22

5.	9-2-2021	School Awan	Educational	30
6.	6-3-2021	Shaheed Path Slum Area	Educational	33

Villages & Schools adopted

The Institute has a close association with surrounding villages, Schools, Gram Panchayats, Principals and Community Centers. The institute has adopted the following villages & Schools within about 10 km radius of the institution with the intent of:

- Regular conduct of oral and general healthcare camps.
- Providing free healthcare facilities at their doorstep through Mobile Dental Van. Special attention is paid to oral health needs of women and children in general and pregnant women in particular.
- Providing awareness and education about oral and general health and prevention of oral and general diseases.
- Make local community aware of various communicable and non-communicable diseases and methods of preventing them.

This has led to improvement in oral/dental health of the residents of these villages/schools.

UNNAT BHARAT ABHIYAN

Our Institute in collaboration with Department of Public Health Dentistry is registered in Unnat Bharat Abhiyan under AISHE code of the institute C-49744 dated 13-11 2019. The list of adopted villages is as under: **Uttardhauna, Sarthara, Dhawa, Juggaur, Pappnamau**

An analysis of pattern of disease prevalence and incidence of commonly occurring dental problems and unmet treatment needs provides the basis for measures to improve oral health care in a state of Uttar Pradesh amongst the rural population of India.

Plan of Action for the listed villages are:

- To analyze dental needs of community to determine the strategy for making favorable lifestyle especially rural population in India.
- To suggest and monitor modifications in the lifestyle of this target group belonging to the local community, schools and other groups on preventive oral health care services.
- To organize oral health awareness camps in villages, schools, Panchayat Bhawan, etc.
- To celebrate and spread awareness about various days of international importance in adopted villages.
- To spread awareness about dental diseases and its effects on general health.
- To spread awareness about the harmful effects of tobacco.
- To distribute toothpastes, toothbrushes, tongue cleaners and a pamphlets regarding oral hygiene instruction in remote areas to improve the oral hygiene.
- To provide education at individual, group or mass level. To empower the people to adopt good oral hygiene practices in Rural India.

- To provide comprehensive and preventive services in rural population at their doorsteps through the use of mobile dental van.
- To spread awareness in elderly population and school children regarding basic sanitation.
- To explain the ill-effects of tobacco in villages by positive re-inforcement technique like NukkadNataks, skits, drama, plays, etc.
