**Abstract:** The condition, OPVL arises as clinical foci of hyperkeratosis that progressively spread and become multifocal. Many potential etiologies have been hypothesized, but little has been roved about the origin of this disease process. We herein present a case of oral proliferative verrucous leukoplakia (OPVL) and discuss this so called rare entity in light of current information.

**Keywords:** Hyperkeratosis, Oral proliferative verrucous leukoplakia (OPVL)
